-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-32 and 50-53, drawn to subject matter indented wherein the radiotelephone system is combined with a structure for retention of a message signal or for reproduction thereof, classified in class 455, subclass 412.1.
 - II. Claims 33-49, drawn to subject matter wherein a camera is used as a computer peripheral for generating image data that is processed and/or stored by the computer for display to a local user, for downloading to an end user, or for being combined with computer-generated data, classified in class 348, subclass 207.1.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the different inventions are distinct, each from the other because of the following reasons: invention I has utility about subject matter indented wherein the radiotelephone system is combined with a structure for retention of a message signal or for reproduction thereof, while invention II has separately utility about subject matter wherein a camera is used as a computer peripheral for generating image

data that is processed and/or stored by the computer for display to a local user, for downloading to an end user, or for being combined with computer-generated data.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different subclasses, restriction for examination purposes as indicated is proper.
